

# Huw Rowlands

November 2021

Address: Unit 15 of 1, Waddell Place, Curtin ACT, 2605  
Phone: 0409 999 145  
Email: [huw.rowlands@ieee.org](mailto:huw.rowlands@ieee.org)  
Education: Bachelor of Information Technology, Australian National University  
Citizenship: Australian & British  
GitHub: <https://github.com/huwr>

I am a senior software engineer with over 10 years' experience. I have experience in working on many technology areas, particularly specialising on Apple platforms. I have enjoying working with technical and non-technical people, and the challenge of bridging the two areas.

I am self-motivated and comfortable working with limited oversight; especially eager to learn new things and acquire the business knowledge needed to make software that meets users' needs.

## Itty Bitty Apps (2018 – present)

At Itty Bitty Apps, I have been focusing on Apple platforms, mainly iOS. I have worked on-site with several high-profile clients to create high-quality mobile apps and services. Such clients include AGL, Latitude Financial and Centr, by Chris Hemsworth. Working here has allowed me to learn deep knowledge about working with Apple platforms, reactive programming (RxSwift and Combine), SwiftUI and UIKit.

## DiUS Computing (2014 – 2017)

DiUS is a mid-sized technology consultancy in Melbourne and Sydney. I worked on-site with a diverse range of clients. Each project was completely different, and required me to learn technologies each time. At DiUS, I didn't just do one thing. I worked with Ruby / Rails, Java, Node.js, JavaScript, AWS to name a few.

## National Library of Australia (2009 – 2014)

At the National Library of Australia, I worked on new and maintenance projects. I created their Mobile Catalogue iOS App, which was the library's first iOS App in 2010 (Objective-C). I also maintained their Digital Collections Manager application, an internal suite of legacy Java apps which maintained the library's digitised collections. It was rewarding to work in a cultural institution preserving and providing public access to Australian History.

## Skills

- iOS Development, Xcode
- Swift, Objective-C
- SwiftUI, UIKit
- Continuous Integration
- Ruby, Java, JavaScript
- Reactive Programming, RxSwift, Combine

## Referees

Referees are available upon request.
